HeinzCollege

The [Summer Security Intensive \(SSI\)](#) is a **paid summer fellowship program (\$2,500+)** for rising college seniors. This program is designed for U.S. citizens interested in pursuing a graduate degree and a career in IT, data analytics, or cyber security.

CMU's Heinz College is home to the most well regarded master's programs in IT Management and Information Security in the world. A unique aspect of our cyber security curriculum is that it is relevant for not only technologists but also for students from all backgrounds with a sincere interest in IT security and policy.

The 2016 Application Deadline is March 1, 2016.

Our goal is to offer the internship to **as many as 20 students** for the 2016 cohort. SSI provides an opportunity for participants to engage in this unique academic and experiential environment. Participants take classes and interact with some of the world's foremost experts in information security.

SSI participants will take three specialized courses over the summer at CMU focusing on security policy and technology implementation as well as engage in an interactive colloquium addressing issues facing security professionals.

Students who complete SSI and are later admitted to a master's program at Heinz College will be eligible to **receive a scholarship of at least 50%** of tuition.
