

About MetaCommunications:

MetaCommunications develops workflow and collaborative productivity solutions that automate marketing, brand management, creative design, packaging and prepress processes so organizations around the world can be more productive. We innovate to help our customers grow. With thousands of customer sites worldwide, we have the solid experience and range of solutions to quickly help your organization take its productivity to the next level through improved processes, workflows and communications. Our products include: Workgroups Davinci, Virtual Ticket, Approval Manager, Digital Storage Manager, and Job Manager. We are headquartered right here in Iowa City in the beautiful new Park at 201 Building. We pride ourselves on cultivating and maintaining an entrepreneurial, casual, and fun work environment.

Career Opportunities:

JavaScript Engineer

We are looking for somebody who has a genuine interest in programming, user interface design, and, of course, JavaScript. Whether you are a seasoned developer or just starting your career, if that combination piques your interest, we'd love to talk to you!

If you join us, you will:

- Use JavaScript on both server and client side to implement new features, product improvements, and customer specific workflows.
- Work on UX specs and mockups for new features.
- Work on proof of concepts using new libraries, frameworks or technologies.
- Have an opportunity to work with other languages and technologies we use (Python, C#, .NET).
- Have an opportunity to take on technical leadership responsibilities in your areas of interest/expertise.
- Be able to take on as many engineering challenges as you would like to.
- Learn a lot.
- Have fun!

C# Software Engineer

We are looking for somebody who has a genuine interest in programming, web services and framework design, performance, scalability and security, and wants to join our Application Server group. If that combination piques your interest, we'd love to talk to you!

If you join us, you will:

- Use C# to advance our server-side JavaScript platform, implementing new features, product improvements, and customer-specific workflows.
- Participate in design and implementation of web services and APIs for new features.
- Have an opportunity to work with other languages and technologies we use (Python, JavaScript, SQL).
- Have an opportunity to take on technical leadership responsibilities in your areas of interested/expertise.
- Be able to take on as many engineering challenges as you would like to.
- Learn a lot.
- Have fun!

Note.js/JavaScript/HTML5/CSS3 Ninja

We expect you to be extremely skilled in most of the following technologies

- JavaScript: Backbone, KnockoutJS, RequireJS, Jasmine/Mocha, jQuery, Underscore, Websockets
- HTML5 / CSS3 / SVG: Bootstrap, Modernizr, Less, responsive web design, mobile web.
- Node.js: Express or similar MVC framework, LocomotiveJS, Passport, bunyan.
- NoSQL databases such as Riak, MongoDB, etc.
- Infrastructure tools: Memcached or Redis, RabbitMQ or another queuing service, distributed logging services like LogStash.
- Amazon Web Services and other cloud providers.
- SCM, build tools, preprocessors, continuous integration, etc.: Git, Grunt, Bower, Less, Jenkins, etc.

Software Support Specialist

- Most of your day will be working one on one with our customers on support issues or adhoc training through phone calls, live chats, and emails.
- Be involved in new customer deployments or upgrading current customers.
- Deal with a broad range of customer issues/questions that include, but are not limited to, operating system, software, and hardware inquiries.
- Capture technical details of software defects and feature requests for our engineering department.
- Create and deliver written and verbal solutions, knowledge base articles, instructional videos, and advice for customer support cases.
- You will become an expert of all areas of our product offerings.

All of these positions are available as fulltime opportunities, but we also LOVE interns. No matter what you are looking for, if any of these positions interest you we would love to hear from you! You may apply by going to our careers page at: <http://www.metacomunications.com/company/careers/index> and following the application guidelines laid out in each job description.

If you have any questions, please contact Greg Ruckdaschel at gruckdaschel@meta-comm.com.
