

We are seeking strong applicants for our PhD and Masters programs for Spring 2021 and Fall 2021.

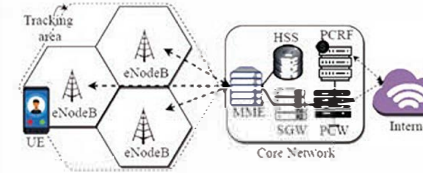

We are particularly interested in PhD applicants in the following research area: algorithms; computer security and privacy; computational epidemiology; formal methods; programming languages; distributed computing; human-computer interaction; mobile systems; parallel optimization; text/web mining; machine learning; informatics; and virtual environments.

Bicycling and pedestrian simulator research (Kearney)

FUNDING

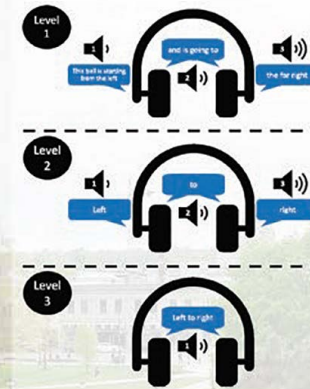

Our Research Assistantships (RAs) and Teaching Assistantships (TAs) provide full tuition, benefits, and a substantial monthly stipend. All PhD students are guaranteed RA/TA support for a minimum of 4 years at admission time. Most Masters students also receive TA or RA support. Besides Assistantships, Fellowships are also available.

4G and 5G Privacy Attacks (Chowdhury)

ALUMNI

Our PhD students pursue careers in academia, research/industry labs, or the tech industry. Our recent MCS graduates have gone on to industry careers in companies such as Amazon, Apple, Collins Aerospace, Epic, Facebook, Google, Intel, Microsoft, and Pearson.

Assistive technologies (Rector)
